Canadian Permanent Resident | Authorized to work in Canada | French: B1

SUMMARY

Software Engineer with experience building scalable backend systems and microservices using C# and .NET, complemented by hands-on experience developing cloud-native applications with Azure, Docker, Kubernetes (AKS), and CI/CD pipelines. Returned to software development in Canada following postgraduate studies, most recently through a .NET/Azure co-op and an ongoing cloud-native microservices project.

SKILLS

Languages & Frameworks: C#, JavaScript, ASP.NET Core, .NET, React, REST APIs, Entity Framework, LINQ, Dependency Injection

Cloud & DevOps: Azure (AKS, APIM, Functions), Docker, Kubernetes, CI/CD, GitHub Actions

Databases & Tools: SQL Server, JWT, Microservices Architecture, Version Control

EXPERIENCE

Software Developer Co-op – Skill Squirrel | Aug 2023 – Dec 2023

- Integrated Stripe payment processing into the application, streamlining digital payments for users.
- Implemented Single Sign-On (SSO) using Microsoft Entra ID, removing the need for users to sign in separately across applications.
- Developed and maintained backend APIs using C# and .NET, supporting core application functionality.

2021–2023: Part-time food service work (Toronto, ON) while completing postgraduate studies at Seneca College.

Software Developer – Cedar Gate Technologies | Jul 2021 – Dec 2021

- Built reusable, user-friendly UI components using React, reducing development time by approximately 20% while improving overall user experience.
- Integrated frontend with .NET Core Web APIs and optimized performance using Webpack.
- Authored onboarding documentation in Jira Confluence, helping new developers ramp up faster.

Software Developer – CodeBee Nepal (Wallbee) | Jan 2019 – Jun 2021

- Built an error-logging REST API to trace and centralize application errors, cutting average bug-fix turnaround time by roughly 30%.
- Developed backend services using C# and ASP.NET Core Web API, improving system performance.
- Implemented SignalR to deliver real-time transaction notifications to users.

PROJECT EXPERIENCE

Cloud-Native Microservices Platform | ASP.NET Core, Azure, Docker, AKS, CI/CD [2024 – Present]

GitHub: <https://github.com/maharjan-sunil/Microservices-Architecture-Demo-on-Azure-Docker-AKS-CI-CD->

- Designed and deployed containerized microservices using ASP.NET Core and Docker, exposed via Azure API Management (API Gateway).
- Implemented secure authentication with JWT and Entra ID (Microsoft Azure AD), applying clean architecture and Dependency Injection.
- Built CI/CD pipelines using GitHub Actions and deployed to Azure Kubernetes Service (AKS), leveraging Azure Functions for asynchronous processing.
- Automated deployment to development and production environments via GitHub Actions, removing manual deployment steps and cutting release time significantly.

EDUCATION

- Postgraduate – Project Management (IT), Seneca College (GPA: 3.6) | 2022
- Postgraduate – Business Analytics, Seneca College | 2023
- Bachelor of Information Management, Tribhuvan University (GPA: 3.6) | 2018
