PROFESSIONAL SUMMARY

Cloud Software Engineer with 4+ years of experience architecting scalable backend systems, web APIs, and enterprise cloud solutions using C# and Azure. Proven track record designing distributed microservices architectures and building robust CI/CD pipelines to deliver secure, high-performance software.

- **Cloud Infrastructure:** Expert in Docker, Kubernetes (AKS), and Azure API Management.
- **Backend Systems:** Deep expertise in .NET Core, asynchronous architectures, and REST APIs.

TECHNICAL SKILLS

- **Backend & Languages:** C#, ASP.NET Core, .NET 8+, REST APIs, Entity Framework Core, LINQ, SignalR
- **Cloud & DevOps:** Microsoft Azure (AKS, APIM, Azure Functions, Entra ID), Azure Service Bus, Docker, Kubernetes, GitHub Actions
- **Architecture & Databases:** Microservices, Clean Architecture, JWT, MS SQL Server, PostgreSQL, Git
- **Frontend Development:** JavaScript, TypeScript, React, HTML5/CSS3

PROFESSIONAL EXPERIENCE

Freelance Cloud Software Engineer | Remote

Jan 2024 – Present

Project Repo: github.com/maharjan-sunil/Microservices-Architecture-Demo

- **Microservices Design:** Architected and deployed a comprehensive, production-grade cloud-native microservices platform leveraging ASP.NET Core and C#.
- **Event-Driven Architecture:** Decoupled distributed services by implementing an asynchronous event-driven architecture using Azure Service Bus as the central message broker, enhancing fault tolerance by 25%.
- **Container Orchestration:** Engineered containerized services using Docker and orchestrated deployments using Azure Kubernetes Service (AKS) to ensure 99.9% high availability and scalability.
- **API Security:** Designed a secure API gateway layer via Azure API Management (APIM), integrating JWT and Microsoft Entra ID for decentralized authentication.
- **CI/CD Automation:** Automated end-to-end cloud deployments by building custom CI/CD pipelines with GitHub Actions, cutting software release times by 40% and eliminating manual configurations.
- **Latency Optimization:** Implemented asynchronous event-driven processing utilizing Azure Functions to optimize system resource management, reducing backend API latency by 30%.

Software Developer Co-op | Skill Squirrel

Aug 2023 – Dec 2023

- **Payment Integration:** Accelerated digital monetization by successfully integrating the Stripe payment gateway API, processing secure user transactions flawlessly.
- **SSO Implementation:** Enhanced enterprise security compliance by implementing Single Sign-On (SSO) authentication using Microsoft Entra ID, delivering a frictionless multi-app user experience.
- **Agile Backend Development:** Developed scalable backend Web APIs using C# and .NET Core, consistently meeting sprint deadlines in an Agile environment.

Software Developer | Cedar Gate Technologies

Jul 2021 – Dec 2021

- **UI Components:** Engineered reusable UI components using React and TypeScript, driving down frontend development cycle times by 20% while establishing a cohesive design layout.
- **Performance Tuning:** Optimized full-stack application performance by seamlessly binding client-side states with .NET Core Web APIs and fine-tuning build bundling via Webpack.
- **Team Onboarding:** Authored technical onboarding runbooks in Jira Confluence, cutting developer ramp-up time for incoming engineering hires.

Software Developer | CodeBee Nepal (Wallbee)

Jan 2019 – Jun 2021

- **Error Logging:** Designed and rolled out a centralized error-logging REST API, decreasing diagnostic overhead and reducing average bug-fix turnaround times by 30%.
- **Query Optimization:** Built core transaction backend engines utilizing C# and ASP.NET Core, optimizing data queries to maximize database execution speeds.
- **Real-Time Streaming:** Developed real-time push engines via SignalR, streaming live transaction notifications instantly to web interfaces.

EDUCATION

Postgraduate Certificate in Information Technology | Seneca College, Toronto, ON

2023

- **GPA:** 3.6 | Specializations: Business Analytics & Project Management

Bachelor of Information Management | Tribhuvan University

2018

- **GPA:** 3.6 | Focus: Computer Science & Business Administration
