Software Developer

Software Developer with 3+ years of experience developing backend systems and Web APIs using C#, .NET, ASP.NET Core, and SQL. Experienced across the software development lifecycle, including software development, testing, deployment, troubleshooting, and documentation. Hands-on experience with Azure cloud services, relational databases, REST APIs, microservices, CI/CD, and automated unit testing. Strong interest in technology consulting, client-focused problem solving, and digital transformation.

Professional Experience

Skill Squirrel **Aug 2023 – Dec 2023**
Software Developer Co-op

- Integrated the Stripe payment gateway API to support transaction processing within application workflows.
- Implemented Single Sign-On (SSO) using Microsoft Entra ID, enabling authentication across multiple applications.
- Developed scalable backend Web APIs using C# and .NET Core to support application business requirements.
- Created automated unit tests using xUnit, Moq, and NSubstitute to validate business logic and API behavior.

Cedar Gate Technologies **Jul 2021 – Dec 2021**
Software Developer

- Contributed to migrating legacy ASP.NET interfaces to a modern React and TypeScript UI, improving frontend maintainability and user experience.
- Integrated client-side application state with .NET Core Web APIs to support full-stack application functionality.

CodeBee Nepal (Wallbee) **Jan 2019 – Jun 2021**
Software Developer

- Designed and developed a centralized REST API for error logging, reducing average bug-fix turnaround time by 30%.
- Developed transaction-focused backend services using C#, ASP.NET Core, Entity Framework Core, and SQL, optimizing database queries for improved execution performance.
- Developed real-time push notifications using SignalR, enabling live transaction updates across web interface

Personal Project

AI-Powered Ticketing & Support System **Jan 2024 – Present**
Tech Stack: C#, ASP.NET Core, React, TypeScript, Vite, Azure, Docker, GitHub Actions

- Developing a full-stack support platform that helps teams manage customer queries, track tickets, and streamline issue resolution through an AI-assisted workflow.
- Integrating LLMs to automatically classify incoming tickets, recommend priorities, summarize conversations, and generate response drafts to reduce repetitive support tasks.
- Implementing retrieval-augmented generation (RAG) with embeddings and vector search to answer support questions using relevant company knowledge-base documents and provide context-grounded responses.
- Building secure REST APIs in ASP.NET Core and a modular React frontend with TypeScript, reusable components, custom hooks, and Axios-based API integration.
- Designing an event-driven architecture using Azure Service Bus, containerizing services with Docker, and implementing automated unit tests and GitHub Actions CI/CD for reliable deployment.

Education

Seneca College — Toronto, ON, Postgraduate Certificate in Information Technology 2023

- GPA: 3.6 | Specializations: Business Analytics & Project Management

Tribhuvan University, Bachelor of Information Management 2018

- GPA: 3.6

Technical Skills

Programming & Backend C#, .NET, ASP.NET Core, REST APIs, Entity Framework Core, LINQ, SignalR
Databases SQL, Microsoft SQL Server, PostgreSQL, Relational Databases

Cloud & DevOps	Microsoft Azure, Azure Functions, Azure Service Bus, Azure API Management, AKS, Docker, Kubernetes, GitHub Actions
Software Engineering	Microservices, Clean Architecture, Dependency Injection, JWT, Unit Testing, xUnit, Moq, NSubstitute
Frontend	JavaScript, TypeScript, React 18, Context API, Custom Hooks, Tailwind CSS, Axios, HTML5/CSS3
Tools	Git, GitHub
