Software Developer (.NET / Azure)

.NET backend developer with 3+ years of experience building REST APIs and transaction-focused services in C#, ASP.NET Core, and SQL. Delivered payment gateway and SSO integrations, automated test suites, and real-time features. Currently building an AI-assisted support platform using LLMs, RAG, and event-driven design on Azure.

TECHNICAL SKILLS

Backend: C#, .NET, ASP.NET Core, REST APIs, Entity Framework Core, LINQ, SignalR, Clean Architecture, Dependency Injection, JWT
Databases: Microsoft SQL Server, PostgreSQL
Cloud & DevOps: Microsoft Azure (Azure Functions, Azure Service Bus), Docker, GitHub Actions (CI/CD)
Testing: xUnit, Moq, NSubstitute
Frontend: TypeScript, JavaScript, React, Tailwind CSS, Axios, HTML5/CSS3
Tools: Git, GitHub

PROFESSIONAL EXPERIENCE

Software Developer Co-op, Skill Squirrel (Canada) | Aug 2023 – Dec 2023

- Integrated the Stripe payment gateway API to process transactions within application workflows.
- Implemented Single Sign-On with Microsoft Entra ID, enabling one login across multiple applications.
- Built scalable backend Web APIs in C# and .NET Core to support business requirements.
- Wrote automated unit tests with xUnit, Moq, and NSubstitute to validate business logic and API behavior.

Software Developer, Cedar Gate Technologies (USA) | Jul 2021 – Dec 2021

- Migrated legacy ASP.NET interfaces to a modern React and TypeScript UI, improving maintainability and user experience.
- Connected client-side state to .NET Core Web APIs to deliver full-stack functionality.

Software Developer, CodeBee Nepal (Nepal) | Jan 2019 – Jun 2021

- Designed and built a centralized REST API for error logging, cutting average bug-fix turnaround by 30%.
- Developed transaction-focused backend services with C#, ASP.NET Core, Entity Framework Core, and SQL, optimizing queries to improve execution time.
- Implemented real-time push notifications with SignalR to deliver live transaction updates in the web interface.

PROJECTS

AI-Powered Ticketing & Support System | Jan 2024 – Present | github.com/maharjan-sunil/Ticketing
C#, ASP.NET Core, React, TypeScript, Vite, Azure, Docker, GitHub Actions

- Building a full-stack support platform where an LLM classifies incoming tickets, recommends priority, summarizes conversations, and drafts replies to reduce repetitive triage work.
- Implemented retrieval-augmented generation (embeddings + vector search) so answers are grounded in knowledge-base documents.
- Designed secure ASP.NET Core REST APIs and a modular React/TypeScript frontend using reusable components, custom hooks, and Axios.
- Built an event-driven backend on Azure Service Bus, containerized with Docker, with unit tests and a GitHub Actions CI/CD pipeline.

EDUCATION

Postgraduate Certificate in Information Technology, Seneca College, Toronto, ON | 2023
GPA 3.6 • Business Analytics & Project Management

Bachelor of Information Management, Tribhuvan University, Nepal | 2018
GPA 3.6
