Software Engineer

Software Engineer with 3+ years of experience building backend systems and web APIs in C# and .NET Core, plus hands-on work with Azure cloud services. Built a microservices platform using Docker, Kubernetes (AKS), Azure API Management, and GitHub Actions CI/CD. Comfortable with REST APIs, asynchronous messaging, React, and Agile teams.

Professional Experience

Skill Squirrel	Aug 2023 – Dec 2023
Software Developer Co-op	
- Integrated the Stripe payment gateway API to process secure user transactions. - Implemented Single Sign-On (SSO) with Microsoft Entra ID, giving users one login across multiple apps. - Developed scalable backend Web APIs using C# and .NET Core, and wrote unit tests using Xunit with Moq and NSubstitute to validate application business logic and API behavior.	
Cedar Gate Technologies	Jul 2021 – Dec 2021
Software Developer	
- Built reusable UI components with React and TypeScript, cutting frontend development cycle time by 20%. - Improved full-stack performance by binding client-side state to .NET Core Web APIs and tuning Webpack bundling.	
CodeBee Nepal (Wallbee)	Jan 2019 – Jun 2021
Software Developer	
- Designed a centralized error-logging REST API, reducing average bug-fix turnaround time by 30%. - Built core transaction backend services with C# and ASP.NET Core, optimizing data queries for faster database execution. - Developed real-time push notifications with SignalR, streaming live transaction updates to web interfaces.	

Projects

Cloud-Native Microservices Platform, Personal Project	Jan 2024 – Present
<i>Project Repo:</i> github.com/maharjan-sunil/Microservices-Architecture-Demo	
- Decoupled services with an asynchronous event-driven architecture using Azure Service Bus as the message broker, improving fault tolerance by 25%. - Containerized services with Docker and deployed them on Azure Kubernetes Service (AKS) for 99.9% availability and scalability. - Designed a secure API gateway with Azure API Management (APIM), using JWT and Microsoft Entra ID for authentication. - Automated cloud deployments with GitHub Actions CI/CD pipelines, cutting release times by 40% and eliminating manual configuration.	

Education

Seneca College, Toronto, ON , Postgraduate Certificate in Information Technology	2023
GPA: 3.6 Specializations: Business Analytics & Project Management	
Tribhuvan University , Bachelor of Information Management	2018
GPA: 3.6 Focus: Computer Science & Business Administration	

Technical Skills

Backend & Languages	C#, ASP.NET Core, .NET 8+, REST APIs, Entity Framework Core, LINQ, SignalR, Unit Testing
Cloud & DevOps	Microsoft Azure (AKS, Azure Functions, Entra ID), Azure Service Bus, Docker, Kubernetes, GitHub Actions
Architecture & Databases	Microservices, Clean Architecture, JWT, MS SQL Server, PostgreSQL, Git
Frontend Development	JavaScript, TypeScript, React, HTML5/CSS3
