Software Developer (C# / .NET / SQL Server / Azure)

SUMMARY

Software developer with 3+ years of experience building and maintaining C#/.NET applications, RESTful APIs, and SQL Server-backed systems. Experienced in ASP.NET Core and Blazor, including a centralized error-logging platform that gave teams one place to track and resolve issues across multiple systems. Modernized legacy ASP.NET interfaces, integrated third-party APIs and secure authentication (Stripe, Entra ID SSO), and wrote T-SQL stored procedures for complex, performance-sensitive queries. Works with business users to validate requirements, and supports delivery with unit tests, code reviews, and clear technical documentation.

TECHNICAL SKILLS

Backend: C#, .NET, ASP.NET Core, REST APIs, Entity Framework Core, LINQ, SignalR, Dependency Injection, object-oriented design
Architecture & Integration: Service-oriented design, Azure Functions, Service Bus, Stripe API integration, Entra ID SSO, JWT
Databases: Microsoft SQL Server (T-SQL, stored procedures, indexing, query optimization), PostgreSQL,
DevOps & Cloud: GitHub Actions (CI/CD), Docker, Microsoft Azure
Testing & Practices: Visual Studio, Git/GitHub (pull requests, code review), xUnit, Moq, NSubstitute, Jira, Confluence
Frontend: Blazor, React, TypeScript, JavaScript, Tailwind CSS, Axios, HTML5/CSS3

PROFESSIONAL EXPERIENCE

Software Developer Co-op, Skill Squirrel (Canada) | Aug 2023 – Dec 2023

- Integrated the Stripe payment gateway API into application workflows, enabling secure online transaction processing.
- Implemented Single Sign-On with Microsoft Entra ID, giving users one secure login across multiple applications.
- Built C#/.NET Core Web APIs from business requirements and delivered them as working, testable features.
- Validated business logic and API behavior against requirements with automated unit tests (xUnit, Moq, NSubstitute).
- Tested features with end users before release and resolved issues found during validation.

Software Developer, Cedar Gate Technologies (USA) | Jul 2021 – Dec 2021

- Migrated legacy ASP.NET interfaces to a modern React and TypeScript UI, improving maintainability and usability for end users.
- Connected client-side state to .NET Core Web APIs, delivering complete full-stack features.
- Prepared technical documentation of features and integrations in Jira and Confluence to support team handoff.

Software Developer, CodeBee Nepal (Nepal) | Jan 2019 – Jun 2021

- Built a centralized error logging platform with a REST API and Blazor UI that collects errors from multiple internal systems into one dashboard, cutting average bug-fix turnaround by 30%.
- Wrote T-SQL stored procedures for complex transaction queries on SQL Server, reducing execution time and keeping data consistent across the application.
- Developed transaction-focused backend services with C#, ASP.NET Core, EF Core, and SQL, optimizing queries to improve execution time.
- Implemented real-time push notifications with SignalR so users saw live transaction updates without refreshing the page.

PROJECTS

SupportDesk – Ticketing & Support Dashboard | Jan 2024 – Present | github.com/maharjan-sunil/Ticketing
C#, ASP.NET Core, React, TypeScript, Tailwind CSS, Axios, Docker, GitHub Actions

- Designing ASP.NET Core REST APIs with an AI-assisted triage step that suggests ticket category and priority, validated before saving.
- Using Docker and a GitHub Actions CI/CD pipeline for repeatable builds.
- Building a React/TypeScript admin dashboard with ticket creation, editing, search, status filtering, and live summary statistics.

EDUCATION

Postgraduate Certificate in Information Technology, Seneca College, Toronto, ON | 2022 – 2023 | GPA 3.6

• Business Analytics & Project Management

Bachelor of Information Management (4-year degree), Tribhuvan University, Nepal | 2018 | GPA 3.6
